

What's new with FPL solartogether TM?

In doing so, the agreement will also expand the company's highly popular FPL SolarTogether TM program - more than doubling what's already the largest community solar program in the country across an FPL service area that spans from Miami to Pensacola(1).

What power agreements did the MPSC approve today?

ENERGY AGREEMENTS The MPSC today approved power agreements involving Indiana Michigan Power Co.(Case No. U-21189).

Can I apply for a solar energy system outside PJM?

Pursuant to the CleanEnergy DC Omnibus Amendment Act of 2018 (D.C. Law 22-257),effective March 22,2019,the Commission is no longer able to process applicationsfor facilities that are not within the PJM Interconnection region. Please be advised that As Built Construction Drawings must accompany each RPS application for solar energy systems.

Do I need a construction drawing for a certified solar energy system?

Please be advised that any person or entity seeking amendments to a certified solar energy system's capacity and/or orientation shall be required to submit as-built construction drawings that include the tilt and azimuth measurements.

Why do solar panels have a lower AC rating than DC?

Well,the utility companies recognize that the AC rating of a solar energy system is usually much less than the DC rating. This is due to design practices that size the solar panels greater than the solar inverter,and also accounts for conversion losses and real world effects.

What is the vote solar agreement?

The approved agreement, which was also signed by Vote Solar, The CLEO Institute and Federal Executive Agencies, will phase in new rates starting in 2022 and supports continued long-term investments in infrastructure, clean energy and innovative technology - including the largest solar buildout in the United States.
