The Al-Kharsaah solar power project applies the latest solar energy technologies, including dual panels, to save space and optimise electricity production by capturing the direct sun rays, as well as the rays reflected on the ground.

(C) 2025 Solar Energy Resources

This Marubeni investment-backed plant, which was inaugurated on October 18, is the first large-scale solar power generation project in Qatar, with a maximum output of 800 MW. The power generated will be sold to Qatar's General Electricity & Water Corporation Kahramaa under a long-term contract of 25 years.

Qatar plans to boost solar power to 30% of its electricity production by 2030 as part of a sustainable energy transition. Learn about the initiatives and projects, including the Al Kharsaah Solar PV Power Plant, ???

Qatar's first solar power plant, built by Chinese companies, was put into operation on Tuesday, marking a milestone for the country in energy transition. The 800MW AI Kharsaah Solar Power Plant, located in the desert area about 80 kilometers west of its capital Doha, is one of the largest in the Middle East.

This Marubeni investment-backed plant, which was inaugurated on October 18, is the first large-scale solar power generation project in Qatar, with a maximum output of 800 MW. The power generated will be sold to Qatar's General ???

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

Located 80 km West of Doha, the Al Kharsaah plant is the first large scale photovoltaic plant in Qatar with 800 MWp installed solar capacity. The plant was constructed on a 1000-hectare terrain, equivalent to approximately 1400 football pitches, and integrates 2 million high-efficiency bifacial modules mounted on single-axis trackers.

Located 80 km west of Qatar's capital, Doha, the Al Kharsaah Solar PV Independent Power Producer (IPP) project is the country's first large-scale solar power plant and is set to significantly reduce its environmental footprint.

Qatar's first solar power plant, built by Chinese companies, was put into operation on Tuesday, marking a milestone for the country in energy transition. The 800MW AI Kharsaah Solar Power Plant, located in the desert ???

Qatar plans to boost solar power to 30% of its electricity production by 2030 as part of a sustainable energy transition. Learn about the initiatives and projects, including the Al Kharsaah Solar PV Power Plant, driving this shift towards renewable energy in Qatar.

The Al Kharsaah solar power plant in Qatar has completed construction, been started up and connected to the country's national grid, the company behind the project has announced. Developed by TotalEnergies, in partnership with QatarEnergy and Marubeni, the plant, which is located 80-kilometres west of the capital, Doha, is the first large

Qatari state-owned petroleum company QatarEnergy has unveiled plans to build a new 2GW solar power project in Qatar's Dukhan area. The initiative is expected to more than double Qatar's solar energy production capacity, while significantly contributing to the nation's lower carbon emissions.
