Top questions to ask solar company salespeople. When sitting down with a solar salesperson, you might not know which questions to ask, or even what answers to look for. It very well may be that the company that showed up at your door to sell you a solar energy system is not the company doing the actual installation. This is not a red flag.

# QUESTIONS TO ASK SOLAR ENERGY COMPANIES

Questions To Ask A Solar Company . The decision to install your own solar energy system should not be an impulse purchase. Plan to set aside time to research companies, prepare great questions, establish your energy goals, determine financing and learn the basics of how these systems work. Selecting a qualified solar company you trust is going

Most solar energy providers work with financial institutions to offer solar loans, which allow homeowners to pay for their solar systems in installments instead of paying up front. Some solar companies will offer solar leasing or PPAs because they own the panels.

The problem with these "deals" is the homeowner does not own their panels and will pay the solar company for electricity rather than a utility company. Like utility companies, solar companies who offer these deals will bump the cost of electricity up through price escalators every few years, cutting any savings the homeowner was once
