REECHCRAFT POWER POLE SYSTEM

Mid-Continental Restoration has been using the ReechCraft PowerPole system for a long time and knew it would be the right system to complete this project. The working height of this project was 24 ft, which is ideal for PowerPole and meant that PowerPole could free stand with the use of our outriggers and V-Brace without the need for additional

ReechCraft's PowerPole offers access up to 75 feet and is powered by a gearbox and drill, reducing worker fatigue and climbing three times faster than a traditional pump jack. The PowerPole can be used as a single system with a basket, a twin system with a platform, or even multiple systems coordinated together to a customer's specifications.
