K The next generation of solar string inverters
SUITABLE FOR REPOWERING APPLICATIONS
High design flexibility Best serviceability Maximum
power density Minimized BOS costs With maximum
power density, REFU's next generation inverter
family combines compatibility, installation flexibility,
serviceability, and connectivity in a revolutionary
design.

REFUsoI 50K-3T 982081 | 04 | 2021-05 2.4
Designated Use The REFUsoI 50K-3T, is a solar
inverter, which trans-forms the direct current
generated by the PV generator (photovoltaic
modules) into alternating current and can feed it into
mains supply. The REFUsoI 50K-3T complies with
protection class IP65 and can be used indoors and
outdoors.

REFU Inverts have proven itself in more then 300.000 installation ??? every day. The combination of a PV or a Battery-Storage installation and a REFU Inverter will allow you to cover your energy requirement with self-produced and clean ???

REFUsoL 40K / 46K String inverters for large systems Performance and reliability are what counts in large PV systems. The new string inverter REFUsoL 40K/46K offers both. It is available in two performance classes: With 40 kW for 400 V AC voltage and with 46 kW for 460 V AC vol-tage. The REFUsoL complies with protection class IP65, is

Each solar inverter can be connected to our cloud-based monitoring portal REFUlog using Ethernet or RS485 connections, offering professional monitoring Connector to connect the irradiation sensor to REFUsoL inverter 08K ??? 46 K
*) The derating of the maximum open circuit voltage depends on the installation altitude: Altitude above Sea

The REFUSol 48K-UL inverter, also referred to in these operating instructions as the inverter, is a solar inverter, which transforms the direct current generated by the PV generator (photovoltaic modules) into alternating current and feeds this to the public power supply network. The inverter is manufactured according to the rules and current

Scope of this Manual stand. This manual applies to the following products: Tab. 1: Symbols/signs ??? REFUSol 20K-2T Solar Inverter ??? REFUSol 33K-2T Solar Inverter Symbol Meaning Useful information on the optimal and most eco- nomical use of the product. Page 6: Warnings In This Manual Measures required to avoid the danger.

REFUSol 25K. REFUSol 33K. REFUSol 50K. REFUSol 110K. REFUSol 125K. REFUSol 350K. REPOWERING; SUPPORT. expanded the field of electronics and has now developed as one of the leading suppliers of power electronics in the solar and storage systems segment: Over 350.000 REFU Inverter in the field. REFU produces REFU design inverters for

REFUSOL??? Solar inverter Kind of documentation
Operating instruction Purpose of the documentation
This documentation shall explain the REFUSOL device. Information provided ??? on the commissioning of the equipment ??? on fault messages, with details about cause and remedy
This description is applicable as from November 2008

Compatible with legacy REFUSol inverters The completely new range of REFUSol 20K???33K-2T inverter is developed for a maximum of flexibility in commercial and industrial PV systems. With two MPP trackers, each system design can be realized, including different orientations and tilts.
Compact

REFUSol 24K-UL /48K-UL The new generation Lightweight and compact Natural convection cooling SunSpec compliant Based on the line of innovative and efficient REFUSol 08 23K and REFUSol 40/46K inverters, we developed our REFUSol 24K-UL and REFUSol 48K-UL specifically for the Americas.
Flexible: One SKU for different applications, due to
