Renewable energy in Latin America: Argentina;  
Renewable energy in Latin America: Argentina. The PPA issued with the tender process addresses convertibility issues and the guarantees in case of events that prohibit free currency conversion. 2024 that, in collaboration with the Department of Justice (DOJ) it had finalized rules proposed

Latin America and the Caribbean's (LAC) clean energy transition faces a unique set of challenges. Home to over 650 million people across 33 countries, and vulnerable to climate shocks, LAC is also one of the most divergent and unequal regions of the world, with over 16 million people without access to electricity.

Countries worldwide are rallying to support energy transition initiatives as part of their climate goals and also to stay business-competitive in a changing global economy. This is a revolution, and Latin American countries too are at the forefront, boasting a robust pipeline of renewable energy projects.
