Scottish Renewables is the voice of Scotland's renewable energy industry. Discover how we work with the government to support your business. We use cookies on our website to track and enhance your user experience.

The report "The economic impact of Scotland's renewable energy sector 2023 Update" is available here. The methodology used to capture the employment associated with renewable activities means that the modelled numbers in this report are not directly comparable to those previously reported. The report focuses on a model of the Scottish economy

Reputable, renewable energy installation companies should be members of the Renewable Energy Consumer Code (RECC) as it indicates that a company has signed up to its Office of Fair-Trading approved Consumer Code, which ensures high service standards before, during, and after the installation of renewable energy technology.

Aventus Eco, installers of green energy solutions; heat pumps, solar and battery storage have secured investment of up to ?100,000 from tech entrepreneur Ed Broussard to invest in training, new jobs and to scale their operations in Scottish cities including Glasgow, Edinburgh, Stirling, Perth, Ayrshire, Livingston and Lanarkshire

We're leading Scotland's drive to net zero, delivering offshore and onshore projects with a combined investment total of ?3.5 billion, including Seagreen offshore wind farm off Angus and onshore wind farms Viking in Shetland and Gordonbush Extension near Sutherland. Statkraft is Europe's largest generator of renewable energy, and a

Renewable and low carbon energy will provide the foundation of our future energy system, offering Scotland a huge opportunity for economic and industrial growth. We are promoting and exploring the potential of Scotland's renewable energy resource and its ability to meet our local and national heat, transport and electricity needs, while also

Scotland's Energy Minister, Paul Wheelhouse, said: is an extension of the Home Energy Scotland loan scheme which offers interest free loans for those wishing to install renewable and energy efficiency measures in their homes. Through the new offering, ?4.5 million will be allocated across the new incentive to offer homeowners a 75% cash

Below, Carbon Brief looks at MCS's installation figures for 2023, picking out some of the most significant domestic developments. Record clean energy growth . The UK had already recorded its "best-ever" year for renewable energy and low-carbon heat installations before 2023 came to end, as Solar Power Portal reported in December.

At Volt Group (Scotland) Ltd we specialise in a range of service offerings, and not only within the Renewables sector, but also across the Electrical, Thank you for contacting this installer through "The Renewable Energy Hub" please expect a phone call over the next 48hrs (usually much sooner) to discuss your project further.

There is 15.4 GW of renewable electricity operational capacity in Scotland as of the end of March 2024. As of the end of March 2024, there are 790 renewable energy projects, with an estimated capacity of 46.8 GW in the planning pipeline. The largest contributor to this potential increase in capacity is storage (20.2 GW).

Building standards promote the use of energy from renewable sources to meet Scotland's targets in relation to reducing the emission of greenhouse gases and energy demand in buildings. In 2007, "The Sullivan Report - A Low Carbon Building Standards Strategy for Scotland " recommended staged improvements in energy standards in 2010 and 2013

Home Energy Scotland loan and cashback. We have introduced a further incentive via the Home Energy Scotland (HES) interest-free Loan Scheme by offering owner occupiers up to 75% in cashback (capped at ?7,500) towards the installation of renewable heating systems. This incentive makes the uptake of renewable heating more attractive.

3.98 miles away | Scottish Borders Centre for Renewable Energy, Unit 8B Tweedside Park, Tweedbank, Galashiels TD1 3TE Energy Systems Scotland is a well-respected renewable and sustainable energy installer in Scotland. They offer consultation, design, supply, and installation services for a range of technologies, including solar panels (both

A NEW map has been drawn up which reveals the scale and progress of Scotland's renewable energy projects. The interactive guide, published by the Scottish Parliament Information Centre (SPICe), shows information on different developments and their status which can be filtered through parliamentary regions.

Smart Group (Scotland) Ltd. The Smart Group Scotland is a versatile construction company specializing in roofing and heating. Our experience with over 1000 solar pv and air source heating systems gives us a wealth of knowledge in the heating and renewable sector.

Note: there are considerations that are particularly relevant to the installation and operation of wind energy, at all scales. See advice for onshore wind turbines on the Scottish Government website. Useful References. The Routemap for Renewable Energy in Scotland offers guidance on the micro-renewables context. Scottish Natural Heritage

UK Renewable Energy Roadmap 4 Renewable energy already employs more than a quarter of a million people; by 2020, it could be over half a million. The creation of jobs in the renewable energy sector, investment in new manufacturing capability, and the consequent direct and indirect benefits will support our transition to a green economy.
