The IPP Office has three interrelated focus areas: It is a key procurement vehicle for delivering on the national renewable energy capacity building objectives; It is responsible for securing electricity capacity from IPPs for non-renewable a?|

The Minister of Mineral Resources and Energy is pleased to announce that an additional thirteen (13) projects under the 5th Bid Window of the Renewable Energy IPP Procurement Programme (REIPPPP Bid Window 5) have signed legal agreements on 8th December 2022, paving the way for additional new generation capacity to come on-line from a?|

As a European Independent Power Producer (IPP), we actively drive the energy transition forward. By operating our own assets, we contribute to reducing CO2 emissions and ensuring a sustainable energy supply.

The South African energy industry is being transformed by the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement Programme (REIPPPP). Many power purchase agreements (PPAs) have been signed between Eskom and Independent Power Producers (IPPs) and many more are expected.

Over 70 per cent of Kenya's power plants run by IPP's operate on renewable energy sources. When it comes to driving sustainable energy future, IPPs are at the forefront not to mention, leaders

The resulting program, now known as the Renewable Energy Independent Power Producer Procurement Program (REIPPPP), has successfully channeled substantial private sector expertise and investment into grid-connected renewable energy in South Africa at competitive prices. To date, a total of 64 projects have been awarded to the private sector, and

In March 2011 Renewable Energy Independent Power Producer Programme (REIPPPP), a public procurement programme, replaced the Feed-in Tariff system, which was introduced in 2009. Qualifying technologies: onshore wind, solar PV, solar thermal, biomass solid, biogas, landfill gas and small hydro plants. A ceiling tariff level is established for each technology in the auctions.
