

The Leading Edge: November/December 2023
Wind Energy Newsletter. In this issue, Since 2013, the National Renewable Energy Laboratory's Controllable Grid Interface has helped manufacturers and system operators understand how renewable energy systems, such as wind turbines, react to grid disturbances before they are deployed.

Reaching Out: NREL Community Connection Newsletter a?? Quarterly news covering NREL giving activities and community involvement. Your personal data will only be used for as long as you are subscribed. The National Renewable Energy Laboratory is a national laboratory of the U.S. Department of Energy,

The biannual U.S. Department of Energy (DOE) Wind Research and Development (R&D) Newsletter provides recent news about the Wind Energy Technologies Office's R&D projects, A comprehensive analysis released by the National Renewable Energy Laboratory (NREL) indicates that nearly 1,400 gigawatts (GW) of distributed wind capacity could be

The U.S. Department of Energy (DOE) Bioenergy Technologies Office's (BETO) quarterly newsletter covers BETO's recent research, development and demonstration (RD& D) that is contributing to the success of the bioeconomy. BETO's mission is to support the RD& D of technologies aimed at mobilizing domestic renewable carbon resources for the reduction of a?|

The Energy Digital newsletter covers the latest headlines in Energy 4.0, Global Energy investments, innovation, automation & AI, smart technologies and sustainability - connecting the world's largest community of a?|

The Leading Edge Newsletter. The Leading Edge is a monthly newsletter that highlights the latest from the National Renewable Energy Laboratory's (NREL's) Wind Energy Program.. In this newsletter, find highlights of NREL's latest news and tools, spotlights on partnerships and team members, links to recent publications and upcoming opportunities, and more in land-based, a?|

In this month's newsletter, ODOE announces grant recipients for the Community Renewable Energy Grant Program and the Energy Efficiency and Conservation Block Grant Program, publishes a new Oregon Energy Security Plan, plugs into a new Grounded podcast episode, and more.

The biannual Wind Research and Development (R&D) Newsletter provides recent news about the Wind Energy Technologies Office's R&D projects, DOE's Office of Energy Efficiency and Renewable Energy recently selected four wind a?|

. New Delhi: In a major step toward sustainable infrastructure, Tata Power has entered a 25-year strategic partnership with Noida International Airport (NIA) to supply 23.8 MW of renewable energy, integrating wind and solar power. The agreement, valued at a?1550 crore, was formalized with two Power Purchase Agreements (PPAs) in New Delhi, with senior officials a?|

Welcome to our guide to the energy and commodities powering the global economy. Today, reporter Will Mathis attends BloombergNEF's London summit to assess the world's progress toward meeting

Renewable Energy Magazine and Energias Renovables produce English and Spanish language newsletters covering renewable energy technologies with subscription options for wind, bioenergy, and solar. Written a?|

Renewable Energy Magazine-General newsletter. Friday, 25 October 2024. If you can't see the newsletter properly, please visit Friday, 25 October 2024 Newsletter : Fervo Energy, SUU, and Elemental Impact Launch Geothermal Apprenticeship Program .

The Office of Energy Efficiency and Renewable Energy (EERE) uses multiple news outlets to share the latest clean energy technology updates and community successes. tips, events, and information from DOE and EERE. Email Updates. Subscribe to one of our e-newsletters or get a digest delivered to your inbox. EERE Newsfeed. EERE Funding

Solar Energy Technologies Office newsletter. Solar Snapshot: New Small Business Awards and Over \$9 Million in Funding Selections Announced a?? December 15, 2022; Solar Snapshot: Review Responses on the Low-Income Community Solar Subscription Tool a?? November 29, 2022; Solar Snapshot: Local Energy Planning and Resilience Funding Selections; Community Solar a?|

Utility Dive provides news and analysis for energy and utility executives. We cover topics like smart grid tech, clean energy, regulation, generation, demand response, solar, storage, transmission

We've collected the most informative newsletters covering climate, the energy transition, and technologies like wind, solar, storage and green hydrogen. Originally collated in 2019, this list has been fully updated and a?

Description: GlobalSpec's Alternative & Renewable Energy newsletter focuses on energy savings and the environment and explores new ways to generate electricity. Instead of using fossil fuels or nuclear energy, alternative power-generating systems tap into solar, wind, and hydropower, geothermal, and biomass sources, batteries, and fuel cells.

Annual financial commitments to renewable energy technologies, 2013-2018. 5 Q1 2021 Reducing carbon dioxide (CO 2) and other greenhouse gas emissions is key to a long-term, low-carbon, climate resilient future. Just over five years ago, on 12 a?|

The Leading Edge: October 2023 Wind Energy Newsletter. In this issue, NREL celebrates wind energy accomplishments from Fiscal Year 2023, publishes offshore estimates in Nature Energy, receives \$1 million for bat deterrent researcha??and shares the latest news, opportunities, and publications.

Solar Newsletter. The Solar Newsletter is an electronic newsletter that provides information about NREL's research and development of solar technologies. Lopez develops novel geospatial computer modeling to answer real-world questions about renewable energy deployment.
