They can view differing perspectives to help shape their argument and research their topic on renewable energy sources. How does this resource connect with the Australian

In fact, just today(1/24) Scotland has set a goal for using 50% renewable energy by 2030. I think that Scotland has set a realistic goal and that other countries should follow their lead. Non-renewable energy sources are bound to run out and when they do, we can either be ready by using renewable energy or have a global crisis.

# RENEWABLE ENERGY PERSUASIVE SPEECH

Other Renewable Energy Sources. Scientists and engineers are constantly working to harness other renewable energy sources. Three of the most promising are tidal energy, wave energy, and algal (or algae) fuel. Tidal energy harnesses the power of ocean tides to generate electricity. Some tidal energy projects use the moving tides to turn the

This study examines the persuasive effects of moral appeals on public support for the transition from fossil fuels to clean, renewable energy. The global transition from fossil fuels to renewable energy sources (such as solar and wind) will be greatly affected by social factors such as public opinion, consumer demand, and political support.

First of all, renewable energy can have a more stable price. Unlike fossil fuel, renewable energy is a continual source of energy that will not be as demanded, and will not cause inflation. Next, using renewable energy is a key to having a clean and green environment. It will not cause pollution to the environment and will keep cities clean.
