Safety When it comes to occupational safety, we make sure that all requirements are met. We observe our

# RENEWABLE POWER SOLUTIONS PARAGUAY

Hydropower is the main source of Paraguay's electricity generation and one of its main exports. To reap the full benefits of its plentiful endowment of low-cost, renewable energy, Paraguay needs a resilient transmission network, an efficient distribution system, an adequate public policy framework, and an integrated South American power market -

Almost all of the electricity generated in seven countries around the globe comes from renewable sources. Today, over 99.7% of the electricity produced in Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia, and the Democratic Republic of the Congo comes from renewable energy sources like solar, wind, hydro, and geothermal.

Our innovation starts with the Globe Power company itself, having a unique business model that combines cutting edge generator and battery design and manufacture, under the one roof. Disrupting typical design boundaries promotes lateral thinking and creativity ??? in the renewable energy space especially ??? Globe's forward focus.

Over the next decade, we expect Latin America's power mix to remain dominated by hydropower despite non-hydropower renewables" rapid growth in the region. Amid the volatility of hydropower and frequent power grid issues in the region, we expect an increase in net electricity imports across importing markets in Latin America.

This includes phasing out coal-fired power plants and transitioning to the aforementioned renewable energy sources. Perusahaan Listrik Negara, Indonesia's state-owned power utility, is in the process of designing a new green transmission line that will extend 70,000km, as stated by CEO Darmawan Prasodjo in a company statement.

# RENEWABLE POWER SOLUTIONS PARAGUAY

The energy mix of the Republic of Paraguay is dominated by clean energy sources, where hydropower accounts for the largest share of the country's power generation, representing around 99.5% of the installed power capacity. Paraguay sees the need to encourage the diversification of its energy mix through the adoption of renewable energy and

Andes Solar's projects support the expansion of renewable energy in Paraguay and strengthen the broader regional energy transition. They set an example for other Latin American countries striving to reduce their dependence on fossil fuels and embrace cleaner, renewable power sources.

Paraguay has launched an ambitious energy policy, targeting a diverse, sustainable energy mix by 2050. Focusing on solar, hydrogen fuel, and biofuels, the country aims to secure energy independence and reduce reliance on hydrocarbons. A Pioneering Energy Strategy for Paraguay The Paraguayan government unveiled a transformative energy policy to ???
