

Renewable Energy (RE) offers proven alternatives to the burning of fossil fuels for power generation. The Government is committed to the development of RE in Hong Kong with a view to further improving our air quality.

? 1/4 ?? 1/4 ? renewable energy? 1/4 ? ,, [2]? 1/4 ? ,, ???????? ??? ??? ??? ??? , [2] ???

Renewable energy, usable energy derived from replenishable sources such as the Sun (solar energy), wind (wind power), rivers (hydroelectric power), hot springs (geothermal energy), tides (tidal power), and biomass (biofuels). Several forms have become price competitive with energy derived from fossil fuels.

RENEWABLES ENERGY

Renewable energy (or green energy) is energy from renewable natural resources that are replenished on a human timescale. The most widely used renewable energy types are solar energy, wind power, and hydropower. Bioenergy and geothermal power are also significant in some countries.

? 1/4 $\ref{1/4}$? renewable energy? 1/4 ? ,, [2]? 1/4 ? ,"

Renewables, including solar, wind, hydropower, biofuels and others, are at the centre of the transition to less carbon-intensive and more sustainable energy systems. Generation capacity has grown rapidly in recent years, driven by policy support and sharp.
