Who is Rhino Onward? We provide solutions that help combat the negative impacts of climate change. With societies around the world maturing there is an increasing demand of energy. Climate change threatens our societies and environment. To reverse climate change, renewable sources of energy are needed to replace fossil fuels, however

Le Bassin du Congo s'étend sur plus de 3.6 millions de km² (plus que les surfaces de l'Inde et de la France réunies !) et 6 pays d'Afrique de l'ouest et central : la République du Congo (ou Congo-Brazzaville), la République Démocratique du Congo (ou Congo-Kinshasa), le Gabon, le Cameroun, la République centrafricaine et la Guinée équatoriale.

Guinea DR Congo live score (and video online live stream) starts on 16 Nov 2024 at 19:00 UTC time at Stade Olympique Alassane Ouattara stadium, Abidjan city, Côte d'Ivoire in Africa Cup of Nations, Qualification, Group H, Africa.

This early work led to Aaron being hired full time with Rhino Onward International (ROI) in early 2022. Aaron's lifetime cultural commitment to climate change drove him to integrate leading technology and built a process for producing Hydrogen with Solar energy. This process was developed to maximize synergies and growth opportunities to

How does gorilla trekking in DR Congo compare to other countries? "The gorilla trekking experience in Kahuzi Biega (and when it reopens, Virunga NP) is very similar to what is offered in Rwanda and Uganda. leopard, buffalo, elephant and rhino) destination. Wildlife densities in Akagera are not comparable to the most famous parks in East

Le Congo que nous souhaitons vous faire d?couvrir, c'est celui de la R?publique du Congo. Il correspond ? l'ancien Congo fran?ais (1882-1910), surnomm? " Congo-Brazzaville " ou simplement "Congo". Situ? ? l'est du continent africain, le Congo-Brazzaville a pour voisin le Gabon et le Cameroun.

ROI takes in two untapped resources, solar energy, and brackish water to produce green electricity, hydrogen, and potable water. As part of our original process, we treat brackish water from either a deep formation, unusable aquifer, or seawater for either direct delivery or to prep the water to be used in hydrogen production.
