

Who is runergy PV technology (Thailand)?

Runergy PV Technology (Thailand) serves as a subsidiary of Jiangsu Runergy New Energy Technology(China). They are renowned for being an industry-leading manufacturer of solar cells,with a strong focus on research and development,and the production of modular and high-performance solar cells,capitalizing on global new energy opportunities.

Does runergy produce solar cells in Southeast Asia?

Data from InfoLink shows that Runergy has significant solar cell production capacity in Thailand and Vietnam. However,factories established by Chinese solar companies in Southeast Asia face substantial challenges due to recent US trade policies.

Who is runergy solar?

Runergy Solar | 26,914 followers on LinkedIn. Professional solar module manufacturer and comprehensive energy solution provider | Founded in 2013, Runergy is an international and integrated leading technology PV company, specializing in the research and development, manufacturing, and shipment of PV solar cells and modules.

What makes runergy unique?

Leveraging solar cell technology expertise, Runergy expanded its presence in the solar industry, with facilities including Ningxia polysilicon plant, Jiangsu cell & ultra-high efficiency cell plants, Jiangsu module plant, Thailand cell & module plant, and Yunnan ultra-high efficiency cell plant, ensuring global client demands are met.

When will runergy PV technology (Thailand) start production?

In November 2023,they plan to initiate trial production,followed by official production in the first phase. The entire project is expected to be fully operational by June 2025. Runergy PV Technology (Thailand) serves as a subsidiary of Jiangsu Runergy New Energy Technology (China).

What is runergy new energy technology?

preserving it with photovoltaic energy. To contribute to societal advancement through the creation of clean energy. Runergy New Energy Technology Co.,Ltd,founded in 2013,is one of the most famous and innovative solar technology companiesin the world.

Leveraging solar cell technology expertise, Runergy expanded its presence in the solar industry, with facilities including Ningxia polysilicon plant, Jiangsu cell & ultra-high efficiency cell plants, Jiangsu module plant, Thailand cell & module plant, and Yunnan ultra-high efficiency cell plant, ensuring global client demands are met.

Runergy is one such innovator and has become one of the leading PV cell manufacturers in the world since its establishment in 2013. We are ranked 3rd for global PV cell sales by PVInfoLink from 2020 to 2022 with a current high-efficiency cell capacity of 25GW.

Trina Solar has initiated legal action against Runergy for unauthorized use of Trina's TOPCon solar cell technology patents. "Legal action protects the Runergy has allegedly been using Trin" as patented TOPCon manufacturing process in China and Thailand for panels under the Hyperion brand name,

Thailand-based Runergy PV Technology Co., Ltd. will invest a further \$147 million in its Vietnamese factory in the central province of Nghe An, provincial authorities said. The firm is a leading manufacturer of solar energy cells, with plans to invest billions of USD in Southeast Asia. The investment in Nghe An province is part of the firm

Runergy's module factories in China, Thailand, and the US are projected to reach a capacity of 23 GW for high-efficiency solar modules. The company is recognized as a Tier 1 module manufacturer by BloombergNEF and employs 15,000 staff across 17 facilities worldwide, dedicated to providing high-performance solar products and solutions.

By the end of 2023, Runergy's cumulative solar cell shipments surpassed 65GW. Thailand, Vietnam, and the United States. By offering comprehensive solar project solutions, the company adeptly

Based on advantages in the field of solar cells, Runergy further extends the industrial chain to upstream and downstream. Currently, the company's production bases include: Ningxia polysilicon base, Yancheng cell base, Jianhu ultra-high efficiency cell base, Yancheng Hyperion module base, Thailand cell & module production base, and Yunnan

Runergy has also built competitive production capacity in some overseas markets such as the United States, Thailand and Vietnam. It holds a leading position in global solar cell shipments from 2020 to 2023, while providing distributed solar power solutions.

Runergy is a global solar technology company known for innovation and efficient execution. By the end of 2023, the company achieved 63 GW in cell capacity and 11 GW in module capacity worldwide. Expanding its operations, Runergy integrates the solar value chain, with production bases across China, Thailand, and beyond.
