

Why are Sunova solar & thornova solar co-existing?

In the coming months, our two brands --Sunova Solar and Thornova Solar-- will co-exist in our corporate communications as a reminder of our origins, an expression of our development, and a confirmation of our commitment to our customers to provide the on-going best technical support.

Is thornova / Sunova solar a Tier 1 module manufacturer?

In its 4th quarter 2024 report, Bloomberg New Energy Finance (BNEF) continues to list Thornova /Sunova Solar as a Tier 1 module manufacturer. Thornova Solar and Upsolar announce a significant partnership, committed to providing customized solar solutions for the Balkan region, including...Sunova Solar becomes Thornova Solar!

Who are Sunova solar & thornova solar?

Sunova Solar and Thornova Solar are Tier 1 players, focusing on energy solutions and the design and manufacture of renewable energy components, such as photovoltaic modules, solar cells, inverters and solar battery storage solutions.

What happened to thornova solar?

With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar. Our latest high-density PV panels stand for exceptional electricity production and are used in applications ranging from floating solar systems to lowlands and alpine altitudes.

Are thornova solar modules reliable?

Our management team has extensive experience in the solar industry and has established relationships with business partners in the U.S. and around the world. Thornova solar modules have proven reliability and performance, with up to 30-year performance guarantees.

Is thornova a US company?

Thornova is building a strong U.S. presence, with local sales, service and technical support. The company plans to begin manufacturing solar cells and modules in the United States in 2025, enabling its customers to fully benefit from IRA incentives pertaining to domestic content of solar modules.

The Thornova Solar module showed extremely low deviation of on average only 0.24% on the LETID stress tests that take place at 75°C and take 486 hours at Kiwa PVEL but only 162 hours for IEC 61215-2016 module certification. LETID is a phenomenon closely related to PERC cells and occurs when cells reach temperatures over 40°C during operation.

From pv magazine Global California-headquartered Thornova Solar has started production of solar cells and modules at a factory on the Indonesian island of Batam. Thornova Solar's 2.5 GW production lines will supply the US market with modules ranging from 400 W to 720 W, using passivated emitter and rear cell (PERC) and n-type technology. The ???

Thornova Solar TS-BB54-410W is a PV module fit for both residential and commercial applications. Thornova Solar engineers made the All Black series durable and efficient while minimizing the amount of useful space required for their operation. The Passivated Emitter Rear Contact (PERC) technology ensures excellent power output.

Thornova Solar is committed to embracing change, working as a team, being strong, being bold, being ambitious and being our own heroes. Together with our mission to become the most customer-centric energy enterprise, this makes us a trustworthy and sustainable long-term partner for our customers and all other stakeholders alike.
