Flammable Safety Storage Cabinets offer a secure, convenient, and compliant solution for storing various hazardous materials. These cabinets pass the FM rating test and exceed the Australian Standard AS 1940 for fire-resistance. They enhance workplace safety by providing easy access to stored products, eliminating the need for time-consuming

# SAFETY STORAGE CABINET MYANMAR

A safety cabinet is prefabricated equipment specially designed to carry out the storage of hazardous chemicals in mobile containers protecting their contents in case of fire, for a certain period of time and which meets the safety requirements of this ITC (International Trade Center) and the APQ Regulation (656/2017).

Safety storage cabinets stand out due to a series of key features that should not be overlooked. These cabinets are built with highly resistant materials, capable of withstanding high temperatures, impacts, and other factors that could compromise the integrity of the stored contents. The interior is designed to offer maximum storage capacity
