Because the grid-tie inverter expects a very low impedance network to sink excess power into. If you isolate the property from the external grid but still have the grid-tie inverter and off-grid inverter coupled together, the off-grid inverter will generate an AC signal and the grid-tie inverter will sync to it and start exporting power.

The installation of the 14.3kW Grid Tied Commercial Solar System in Naic Cavite marks a significant leap towards energy efficiency and cost savings for businesses. With net metering capabilities, this system not only powers your commercial establishment but also allows for the export of excess energy back to the grid, potentially leading to
