

Regardless of size or industry, you can run a warehouse entirely on solar power. Warehouses can be power-hungry structures, especially if their operations include cold storage or food preservation. Their large roof spaces absorb lots of heat from the sun, increasing the interior temperature, so these buildings require a lot of energy to power

The winter will obviously be different - I won't have enough solar to run the house or charge the batteries much. I guess in the winter I can get maybe 1/2 a days electricity from charged battery/solar (if I can charge the battery overnight sensibly) so would need to buy 6 to 8kWhr per day. In the height of summer I wouldn't need to buy
