That does look like a good price grab as usually the 5tb's as of late, average around ~$100usd in the U.S. Over the many years and for similar travel reasons, I own ~15 of the 4-5tb versions of the seagate 2.5" portable drives (Shingled Magnetic Recording = SMR) and they"re good for what u/michrech mentioned for reading data. I"ve had 2 of those fail on me due to a power outage ???
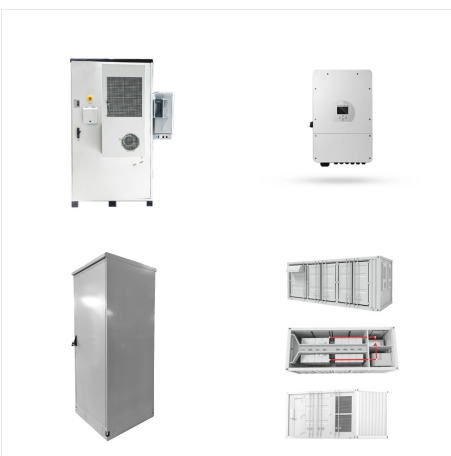

SEAGATE BACKUP PLUS POWER BUTTON

Disconnect the power supply plug from the external drive. Power off the computer. Disconnect the computer's power supply cord for 60 seconds. Reconnect the computer. Power on the computer. Connect the power supply to the external drive. Connect the drive's USB or FireWire cable and check for detection.
