

Which home generator should I buy?

We researched the options and spoke with several experts to select the best home generators you can buy, including our best overall choice, the Briggs and Stratton PowerProtect 26kW Home Standby Generator, chosen for its versatility, power, and reliability.

Did select generators install my Generac back-up generator?

Select Generators did a great job on installing my Generac back-up generator. They were quick, knowledgeable, and responsive throughout - from the initial quotation, system design, support of the HOA approval, installation, final system check out and into operation. Thanks to Tom and Amanda and all involved for a job well done.

Does select generators offer promotional financing?

With promotional financing from Select Generators, major purchases don't have to wait. Get what you want now and pay over time. Certified Generac dealer & installer serving the greater Katy and Houston Texas areas with high-quality whole home generator solutions.

Which generators are rated by CR?

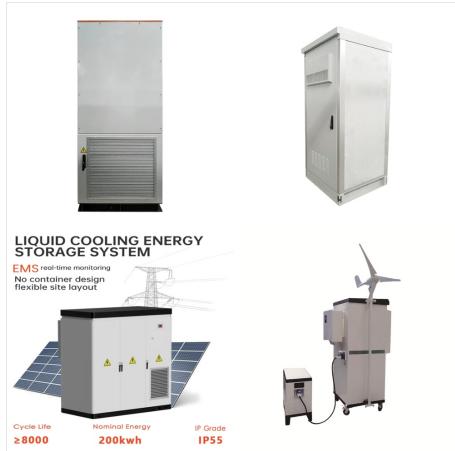

Our generator ratings (available to CR members) feature brands you'll see whether you're shopping at an online retailer, a home center, or a dealer: Briggs & Stratton, Generac, Honda, Predator, and Ryobi. In addition to inverters, they include traditional gasoline-powered portable generators and permanently installed whole home generators.

What should I consider when buying a generator?

You have four options to consider when buying a generator. Home standby generators are installed permanently on your property, can run on natural gas or propane, and kick on automatically during an outage. Portable and inverter generators can be moved around.

Are whole house generators better than portable generators?

Whole house generators are able to do this because they have higher power capacities--22 to 48 kilowatts--than portable generators, and can run significantly longer without maintenance. Portable generator options aren't permanent installations like whole house ones are.

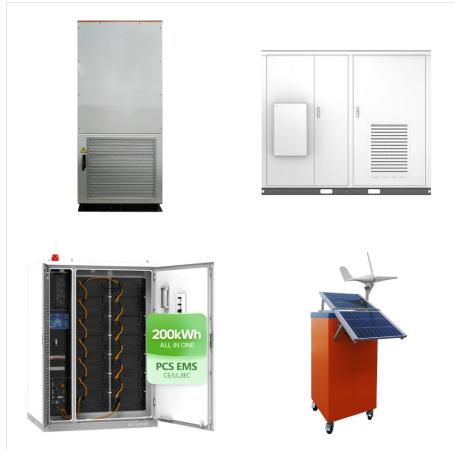

Weight and Warranty: Another best whole house generator in our list is the Generac Guardian 7030 weighs around 399 pounds and is backed by 5-year limited warranty. **Power Capacity:** You can use both liquid propane and natural gas to power your generator. With propane, you will get 9000 watts of output power, and natural gas; it generates 8000 watts of power.

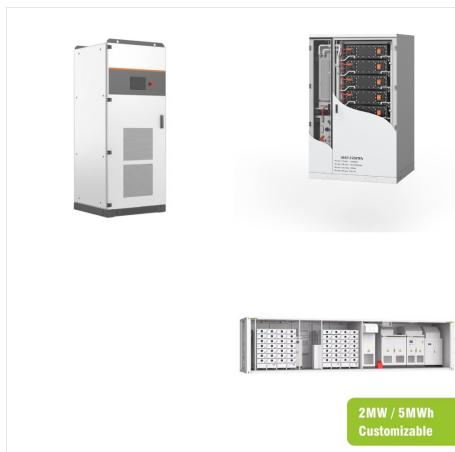

Select Generators did a great job on installing my Generac back-up generator. They were quick, knowledgeable, and responsive throughout - from the initial quotation, system design, support of the HOA approval, installation, a?|

This safety feature shuts down the generator automatically if dangerous levels of carbon monoxide are detected, making it a safer option for extended use. Predator 9500 Vs. GENMAX GM3200i Generator. The GENMAX GM3200i is another competitor in the inverter generator category, but it's a much smaller unit compared to the Predator 9500.

None of the generators in this review do, though the Westinghouse WPro8500 comes close. Although, with a peak capacity of 10,000W, your electricity consumption will seldom reach peak levels and this reduces the total harmonic distortion (THD), which is most prevalent when a generator reaches around 70% of its load capacity.

All inverter generators will make noise while they're running, but some are louder than others. If you want a quiet inverter generator, look for one with noise-suppression technology that brings its noise level down to 50 or 60 decibels. Fuel Source. Inverter generators are either gas-powered or powered by propane.
