PV mini-grids provide electricity to 300 villages in Senegal - Sunny. SMA Corporate Blog by Erik Klügling (guest post),17. Feb. 2023,4 Comments Senegal wants to give its population permanent access to electricity by 2025.

Will Senegal have a power grid by 2025?

One of its aims is to give everyone in Senegal permanent access to the utility grid by 2025. The main focus is on expansion in rural areas, such as with the ASER300 project, which is bringing electricity to 300 villages using mini-grids. Best of all, the technology for the energy supply comes inside a standard shipping container.

What is a mini-grid in Senegal?

And there is plenty of that in Senegal. Mini-grids for ASER300: Electricity supply from a container A mini-grid (also known as an off-grid system or stand-alone grid) is a decentralized electricity supply. It provides a reliable supply of solar power for remote regions without access to the utility grid.
