

What is Kiribati integrated energy roadmap?

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective. As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Does Kiribati have a solar power system?

Kiribati has been successfully using solar PV for outer island electrification for over 20 years. The government owned Kiribati Solar Energy Company (KSEC) has a pool of technicians skilled in the installation and maintenance of off-grid solar power systems.

Should solar PV be deployed in Kiribati?

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with an improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and transport.

How does Tarawa use electricity in Kiribati?

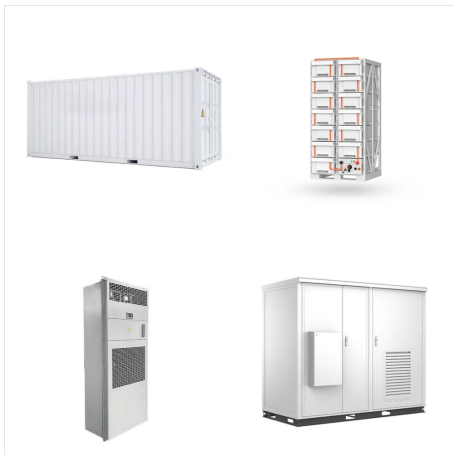

Tarawa uses the bulk of the energy imported to Kiribati. Kiritimati is the largest island in Kiribati, but has little land transport. Instead, most residents are connected to one of the small diesel powered electricity grids located on the island.

How can Kiribati develop a CNO based fuel?

Prepare a CNO implementation plan for Kiribati to determine the specifications and timelines necessary to develop CNO as an acceptable diesel fuel replacement. Establish fuel standards and a testing facility for CNO-based biofuel to be used for power generation and transport. Develop mobile copra mills for use on Kiritimati and outer islands.

Kiribati, a sovereign state in Micronesia in the central Pacific Ocean, is composed of 32 atolls and one raised coral island, dispersed over 3.5 million square kilometers.
