

What is a Nomad system?

From the 2 MWh Traveler to the 214 kWh Pathfinder, the NOMAD system can meet virtually any application need. Leverage cost savings and control of energy storage without extensive investment in fixed assets. Reduce reliance on vulnerable public grids and power infrastructure to minimize unplanned outages or blackouts.

How does Nomad powerdock work?

Rapidly respond to changing grid conditions and bolster energy security. Stack fixed and mobile energy storage assets to modernize your energy strategy while retaining the agility of relocating when and where energy support is needed. The Nomad Powerdock system connects you to power in any environment with one seamless integration.

Where is NOMAD made?

"Every NOMAD system we deliver is manufactured in North America with our unsurpassed commitment to safety and innovation," Coombs said. NOMAD Transportable Power Systems, Inc. ("NOMAD"), is a Vermont-based company formed by KORE Power in 2020 to provide the energy industry with a standardized mobile energy storage platform.

How can Nomad transportable power systems capture a large market share?

Mr. Noble has cultivated numerous client relationships by managing internal and external sales activities, including manufacturing representatives and distributor channels. His economic development expertise, sales cycles, and successful revenue generation will help Nomad Transportable Power Systems capture a large market share.

What types of power options does Nomad offer?

For specialized applications, NOMAD also offers a range of options including those for marine applications, cold or warm weather, additional auxiliary power, hydraulic lifting legs or 50 Hz European configuration. All NOMAD systems are designed to NFPA 855 and are powered by KORE Power battery cells that are UL9540A and UL1973 tested.
