

How much does Singapore spend on R&D?

At its peak in 2008, total spending on R&D accounted for approximately 2.6% of Singapore's GDP. In the aftermath of the 2008 global financial crisis, R&D expenditure as a percentage of Singapore's GDP fell to 2.1% and has remained at approximately 2% since then, with a slight decline to below 2% in the last 4 years to 2019.

Does R&D have a short-run impact in Singapore?

However, the short-run impact of R&D in Singapore is substantially lower than more recent estimates for the OECD countries (TFP elasticity of 0.08 for 35 OECD countries over 1995-2015, rising to 0.3 for the subset of 10 non-European countries) (Tsamadias et al., 2019).

4.4. Testing effect of policy changes

What is Singapore known for?

Since then, nearly 10% of Singapore's land has been set aside for parks and nature reserves. The government has created plans to preserve the country's remaining wildlife. Singapore's well known gardens include the Singapore Botanic Gardens, a 165-year-old tropical garden and Singapore's first UNESCO World Heritage Site.

Is Singapore a parliamentary republic?

Singapore is a parliamentary republic based on the Westminster system. The Constitution of Singapore is the supreme law of the country, establishing the structure and responsibility of governance. The President is the head of state. The governance of Singapore is separated into three branches:

Is Singapore a pragmatic country?

The PAP, self-described as pragmatic, have a syncretic ideology combining free-market principles, civil nationalism, and welfarism. Despite promulgating restrictions on civil liberties, Singapore under the PAP has seen consistent economic growth and political stability.

Is Singapore a multi-racial country?

Multi-racialism is enshrined in the constitution and continues to shape national policies in education, housing, and politics. Singapore is a parliamentary republic in the Westminster tradition of unicameral parliamentary government, and its legal system is based on common law.

Compared to most developed nations, Singapore has very few R& D-based, globally competitive local enterprises. According to the annual R& D surveys, foreign firms' share of Singapore's private sector R& D spending has increased between 65% and 70% in the 2000s to over 75% in the 2010s (Wong, 2022).
