At Smart Building Energies, we are constantly looking for improvements and new developments to make your buildings more intelligent and connected. We develop your smart energy and smart building projects to bring an active dimension and easy management to your building, thanks to the renovation of technical building management systems.

In both building construction and renovation projects, local brands specialised in engineering and works get involved upstream to design and install systems to make buildings smarter and more sustainable and efficient. These business units bring buildings to life by providing ventilation, water, heat, cold, energy and information.
