We

100 kW SoftSun. (Courtesy Luminys Corp.) All the
larger SoftSun units have Cam-Lok tails. The 50k
flicker-free ballast requires a three-phase power
208-240 V AC at 220 A per leg (three phase wires
plus ground), 50/60 Hz. So be prepared with 4/0
cable to power this light. Luminys also makes a
50/100 kW ballast that can power either light.

The Deye 70-110K grid-connected inverter is suited
for medium and large-scale commercial rooftops
and ground-mounted solar PV system in which
reliability and stability are important. the full series
inverter has 30% DC input oversizing ratio and 10%
AC output overloading ratio, offering a faster return
on investment.
