

Need a bigger (or smaller) system to offset your electricity use? The average price per watt of solar power in Rhode Island is \$3.29/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$22,056 for a 9.58 kW system. Many states even offer local rebates and incentives that lower the

The current solar power generation in Rhode Island is about 42,000 MWh each year, which is only .05% of the state's energy needs, but it could be much greater. If all solar-viable rooftops were to go solar, power generation could increase to between 3,390 MW and 7,340 MW per year, enough electricity, possibly, to power every home in the Ocean

Summary of Rhode Island solar incentives 2024. There are two huge factors working to boost home solar in Rhode Island: the state's Small-Scale Solar grant program and the Renewable Energy Growth Program. Combined, they mean you'll save thousands up front on a new solar system and can sell the electricity it produces for thousands more.

Stop paying extra to buy your power from the utility. Strong incentives make it significantly cheaper to generate your own clean energy in Rhode Island. Solar will lower your energy costs and give your business an advantage. Learn More About Commercial Solar.

Rhode Island, with its scenic coastline, is becoming a renewable energy trailblazer by offering financial incentives to homeowners shifting to solar power. A key advantage is the Federal Solar Investment Tax Credit (ITC), which lets homeowners deduct 30% of solar energy system installation costs from their federal taxes.
