Home; Company Directory (61,800) drawing from our extensive 17-year expertise in the import-export of electronic and household appliances. Through established partnerships with leading manufacturers and distributors

The average American home uses 900kwh per month or 30kwh/day, which is equal to 25-35 250W solar panels. The solar panel's rating and how appliances are used determine the total monthly wattage consumption. RV monthly power consumption is much lower though, and solar powered homes use power conservatively.
