

Should you install solar and battery storage in Florida?

By installing solar and battery, Floridians can help their state transition away from its reliance on fossil fuels in addition to reducing their electricity costs, providing backup power for outages, and increasing their home values. There is clearly a lot of upside to owning solar and battery storage in Florida.

Should you power your home with solar and battery in Florida?

If you're thinking about powering your home with solar and battery in Florida, you could do a lot worse in terms of energy savings and preparing yourself for power outages. Like staying on the grid, for example. Florida is nicknamed the Sunshine State for a reason.

Should you buy a solar home in Fort Myers?

Further south, 200,000 homes in the solar powered community of Babcock Ranch all have full power while Fort Myers is all but devastated just 12 miles away. Solar and battery can be a money-saver when the power is on, and a lifeline when the power is off. It can also increase the value of your home.

Can you use solar panels in Florida?

And if you pair your solar with battery storage, you'll have backup power for Florida's frequent and long-lasting power outages. Thanks to abundant sun and a strong net metering policy, Florida is an ideal place to power your home with solar panels.

Are solar panels worth it in Florida?

Solar panels are absolutely worth it in Florida. Ample sunshine, sales and property tax exemptions, a strong net metering policy, and frequent power outages make solar and battery storage a worthwhile investment in Florida. Based on a real quote from solar.com, a 7.6 kWh solar system can pay for itself in 6-8 years.

How much does solar cost per kWh?

If you divide the net cost of the project by the lifetime production, the cost per kilowatt-hour of home solar plus battery storage for this Florida customer comes to 8.7 cents per kWh. Without battery storage, it breaks down to 5 cents per kWh.
