How much does a residential solar system cost?

In 2023, the NREL estimated that an 8-kilowatt (kW) residential solar system would cost \$2.68 per watt. However, costs can vary widely from region to region, often depending on local labor rates.

What products does a solar power company install?

It manufactures all the products it installs: panels, batteries, inverters, EV chargers, and monitoring app. This allows its products to work together seamlessly to maximize power output and efficiency. It operates in all 50 states, though not in all ZIP codes, either with its own employees or company-certified local installers.

Is SunPower a good solar company?

SunPower was our pick for best overall solar company, but it recently announced that it's filing for Chapter 11 bankruptcy and is selling parts of its business - including Blue Raven Solar - to Complete Solaria.

How much does a rooftop solar system cost?

It's very likely your residential rooftop solar array will cost at least \$10,000, and this can often soar above \$20,000. In fact, EnergySage estimates that an 11-kW system will cost about \$22,000, on average, after factoring in the federal tax credit. The table below lists pricing for companies in our rating.

Since its official launch in January 2016 as a solar company in Dubai, SirajPower has achieved an impressive milestone by holding the largest distributed solar energy portfolio of more than 140MWp under operation.
