Here are the top companies we recommend for solar in Missouri: Purelight Power is the top-rated and largest solar company in Oregon and Iowa.

How much does solar cost in Missouri?

The average price per watt of solar power in Missouri is \$2.86/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$24,663 for a 12.32 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

What solar incentives are available in Missouri?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in Missouri:

Does Missouri offer tax credits for solar panels?

Missouri doesn't offer tax creditsfor solar panel installations. However, it does mandate that electric companies allow net metering. Through this, homeowners can sell their excess energy to local electric

companies for a rate set by the state in exchange for credits they can use on their monthly utility bills to lower the cost.

Solar panels will save you a lot of money over time, but the upfront costs aren"t cheap. The average Missouri homeowner needs a 12.32 kW solar panel system to cover their electricity needs, which comes out to \$35,233 before incentives.
