

How easy was it to work with gogreensolar?

"Working With GoGreenSolar Was Very Easy And Basically Pain-Free" Going solar doesn't have to be complicated. We're here to guide you on a simple and more financially rewarding solar journey. Slash your energy bills, speed up your payback period and boost your property's value. Cut down unnecessary labor expenses and do it yourself.

Do solar panels turn green?

Solar Panels turn green-- Literally. Here's Why That's a Big Deal. Tiny particles make bluish-black photovoltaic panels bright green. This development brings high-efficiency solar panels of many colors a step closer to reality. Researchers in the Netherlands have developed a process for making bright green solar panels.

Can tiny particles make solar panels green?

Tiny particles can make bluish-black photovoltaic panels green. This development brings high-efficiency solar panels of many colors a step closer to reality. (Researchers in the Netherlands have developed a process for making bright green solar panels.)

Is going solar a good idea?

1. Determine your energy needs The first step of going solar involves determining your eligibility. If you don't use an excessive amount of electricity at home -- or if your energy bills are already low -- there's a chance going solar won't benefit you financially.

Should you go solar if you don't use a lot of electricity?

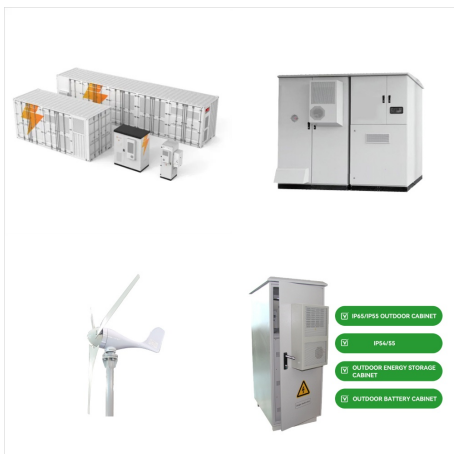

If you don't use an excessive amount of electricity at home -- or if your energy bills are already low -- there's a chance going solar won't benefit you financially. However, rising energy costs in the U.S. mean most homeowners are eligible for electricity savings with a photovoltaic (PV) system.

Why do solar cells turn green?

The solar cells turn green due to the addition of nanocylinders that scatter green frequencies of light back while letting other frequencies pass through. The nanocylinders, which are about 600 times thinner than a human hair, are laid down on the solar cells via a process the researchers likened to rubber stamping.

We've offered Micro Wind Power installations, photo-voltaic (Solar), and Energy Storage Systems since 2008. Jay Nygard, President of Go Green Energy (GGE) received his Mechanical Engineering degree from the University of Minnesota. Prior to that, he served his country in the US Navy as a nuclear power machinist mate.
