Instead, the solar panels, known as "collectors," transform solar energy into heat. Sunlight passes through a collector's glass covering, striking a component called an absorber plate, which has a coating designed to capture solar energy and convert it to heat.

SOLAR ENERGY PANEL COMPANY TAKEOVER A BATTERY COMPANY

A battery's capacity is the total amount of electricity it can store measured in kilowatt-hours (kWh). A battery's power tells you the amount of electricity that it can deliver at one point in time measured in kilowatts (kW). It is important to consider both capacity and power when evaluating solar batteries. A battery with high capacity but low power can only provide a small amount of
