

What is solar energy & how does it work?

Also known as photovoltaic (PV) systems, solar panels absorb sunlight and convert energy from the sun into electricity you can use in your home. This can be stored in a battery or converted into AC power that is distributed throughout your home's electrical system, which can lower your electric bill. Solar energy can also benefit the environment.

What is a residential solar system?

Most residential solar systems are designed to supplement your home's energy needs. This approach reduces your reliance on traditional energy sources while maintaining a reliable power supply.

What are the benefits of solar energy?

Lower utility bills: By generating your own electricity, you can significantly reduce your monthly energy costs.
Environmental impact: Solar energy is clean and renewable, helping to reduce greenhouse gas emissions.
Energy independence: Solar panels can provide power during outages, improving your home's resilience.

What is a home solar system?

A home solar system, also known as residential solar, is a system that converts sunlight into usable energy for residential properties. It comprises solar panels, inverter (s), and a battery (optional) and is also connected to the main power grid. Solar panels are the heart of a home solar system and function by absorbing available sunlight.

Why should you buy a solar system?

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Tax incentives and flexible financing options ensure you get the best price for your solar system. Power your home with emissions-free, renewable energy directly from the sun.

Are home solar systems a good investment?

One of the biggest draws of home solar systems is the potential for long-term cost savings. As homeowners produce their own energy to power their homes, they reduce their reliance on local grid electricity. And the less they use the grid, the lower their utility bills could be.

SOLAR ENERGY SOLUTIONS FOR HOME

Solar energy is free, renewable and clean, but you need to have the right equipment to harness it. You can find this equipment at Solar4Life. Solar power is the energy that is created when sunlight is converted to electricity. In South Africa, we are privileged to have up to 250 hours of sunlight each year, and all of this energy is mostly going to waste.
