

What is a solar EPC company?

What is a Solar EPC Company and What Services Does It Offer? EPC in the solar industry means engineering, procurement, and construction. It is a term that is widely used by companies that provide end-to-end solar energy services, including designing the system, giving procurement details about the system, and installing it.

What services does a solar EPC company offer after installation?

After installation, the solar EPC company will offer after-sale services like maintaining your system through equipment monitoring and maintenance. When working with a licensed solar EPC company, all the services are under one contract for the entire project.

Who are the leading EPCs for solar farms in the UK?

Figure Caption: Solarcentury and Grupotecare the clear joint number 1 lead EPCs for the 5.3GW of completed solar farms in the UK. The remainder of the list is comprised of UK-based companies (BSR, Lark and Anesco) and mainland Europe, in particular Germany and Spain/Portugal.

Where do most solar EPC contractors come from?

Wiki-Solar pointed out that eight of the top 13 solar EPC contractors come from Europe and half of them are German companies.

What does EPC stand for in the solar industry?

In the solar industry, companies that chose their primary service as "EPC" (Engineering, Procurement, and Construction) when applying to the list may also work as developers, rooftop installers, electrical subcontractors, and installation subcontractors. The listed kilowatts installed by each company could be performed within multiple services and not just EPC work.

Why should you choose a solar EPC company?

Besides, after delivering the functional solar system to you, solar EPC companies continue to perform regular checks and continuous maintenance to ensure your solar system works at optimum efficiency. A solar EPC company is more sophisticated, professional, and reliable than a typical installation company.

Selecting the right EPC company is a critical step in your solar project journey.
