

Solarma est une entreprise innovante spécialisée dans la fourniture de solutions solaires et électriques de haute qualité à Madagascar. Nous travaillons avec des projets sur mesure mais ???

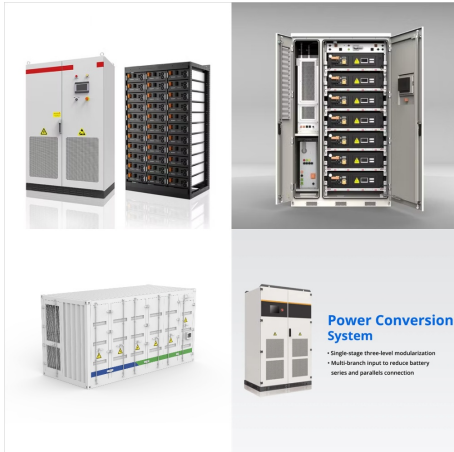

Madagascar offers a potential customer base of 2.5 to 5 million households for solar lamps and market entry solar home systems. The Fund will target companies that provide Malagasy households with quality products that are Lighting Global / VeraSol certified.

The solar power plant installed by WeLight generates electricity during the day and provides enough excess electricity to charge its batteries, which take over at night. Using smart meters installed in private homes, residents can buy their electricity by prepaying directly with their phone through mobile money apps.

For Madagascar, the third African country to join Scaling Solar, a new 30-40 megawatt solar facility will help ease daily interruptions of power service. This island nation suffers from frequent power outages, and under one-third of the population has access to electricity.

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper. atmosfair finances the construction and operation of decentralised solar power grids ("solar mini-grids") in the southwest of the island
