

The International Energy Agency (IEA) reported that the United States installed 15.6 GW ac of solar capacity in in the first quarter (Q1)/second quarter (Q2) of 2024 (the Solar Energy Industries Association reported 21.4 GW dc)???a 55% increase from the record achieved in ???

The U.S. solar market will nearly triple over the next five years, after President Joe Biden signed the largest climate bill in U.S. history into law, according to a new report from the Solar

? According to the Solar Energy Industry Association (SEIA) a record-setting 11 GW of new solar module manufacturing capacity came online in the United States during the first quarter, or a recording setting 71% increase. But to really onshore the solar supply chain, we need to step up the pace on cells, wafer, ingots and polysilicon.

Solar is forecast to make up 58% of new electricity generation installed in the U.S. in 2024, according to an estimate from the Department of Energy. A record 36 gigawatts of solar is
