

Who are the best solar companies in Utah?

Solar installers Tesla and Blue Raven Solartop our list of the best solar companies in Utah. SunPower scored 4.8 out of 5 stars when reviewed against our methodology and stands out for providing the world's most efficient solar panels and a good customer satisfaction score across various platforms.

Are solar panels worth it in Utah?

Utah is among the best states for solar power and one of the top 10 states with the most clear days, helping you put those panels and shingles to good use. Solar panels are worth it for many Utah homeowners, but they won't be perfect for every home.

Is Utah a good place to install solar panels?

With an above-average number of sunny days, relatively low average installation prices and federal and local incentives, Utah ranks 14th among U.S. states in solar energy, producing about 19% of its power from the sun. However, finding the right company for your Utah solar panel installation can be challenging.

How much does a solar system cost in Utah?

Top solar installers in Utah can cost around \$2.72 per watt or around \$16,139 for a 6 kWh solar system. 63% of Western U.S. residents, when asked in the Forbes solar survey, said they are considering installing a solar system in the future, even if it would cost them more upfront than their current home power source.

What is the largest solar system in Utah?

In Utah, Auric's 2,020 kilowatt solar system is the largest, providing 73% of Rio Tinto Stadium's power. Auric, based in Salt Lake City, also earned a spot on Inc. Magazine's list of the 500 fastest-growing companies in the United States.

What solar incentives are available in Utah?

Net metering is another solar incentive available in Utah, although not mandated statewide and thus offered only by certain power companies. With net metering, you receive credits for the excess energy your solar system generates that you don't immediately use, which is sent back to the electrical grid.
