

Does Georgia have net metering for solar panels?

The state of Georgia offers no net metering for home solar installations, meaning a battery can provide some financial benefits through something called "solar self-consumption."

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.

Do you need a license to install solar panels in Georgia?

In Georgia, a solar installer must be associated with a licensed electrical contractor. You can find out if an electrical contractor has the required license at the Georgia Secretary of State's website. Financing options Not everyone has thousands of dollars to spend on a solar panel installation.
