I have built a large deer stand to take family and friends hunting. I would like to have a source of power in the stand to charge electrical devices, run a string of 12 volt LED lights and maybe an auto DVD player (for the kids). 60-80 watt solar panel. 400 watt inverter for 110 volt devices. All necessary cables and mounting hardware. Save

I did it in my blind. Use a 12V feeder solar panel to charge a 12V 8.0aH feeder battery. This runs green LED lights mounted low for morning unpack, and one white LED light up on the roof. Also powers a 12V port for power and phone charging. Have a little 12V huffer fan (bought off Amazon) that I plug into the power port on the warm days. Works
