

How many solar panels do I need to power my house? Everybody's answer to this question will be different. How much electricity you normally use can depend on lots of things ??? like: How big the house is; How ???

How Solar Panels Work. Solar panels work by converting sunlight into electricity through photovoltaic cells. These cells are made of semiconductor materials like silicon, which absorb photons from sunlight. When sunlight hits the cells, it knocks electrons loose from their atoms, creating an electric current.

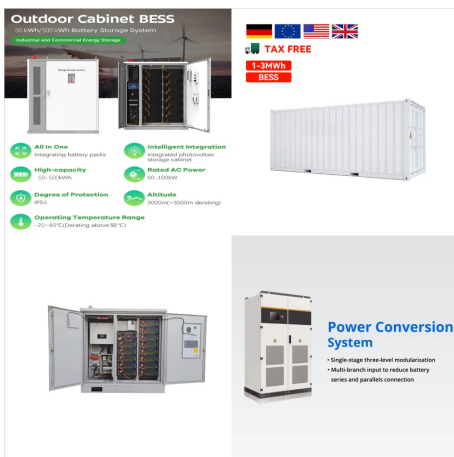

The Solar Outlet offer Tier 1 MCS solar panels, accessories and solar battery storage systems that enable you to affordably harness the power of the sun for your home. As domestic energy costs spiral continually upwards there has never been a better time to consider investing in your own energy source free of any international uncertainty or supply disruption.
