Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.

Installing solar panel and battery kit solar systems can be much less expensive when compared to the cost of installing mains power cables and brings the additional benefits of low-cost, renewable power and self-sufficiency. Read More. As well as providing off-grid power, our solar kits can be installed in partial-grid areas, ideal for
