

? Despite having one of the nation's smaller solar markets, New Hampshire is dedicated to expanding its renewable energy potential. The state aims to generate at least 25.5% of its electricity from clean energy by 2025. Using more solar energy will also help its residents save on higher-than-average electricity rates.

The New Hampshire Public Utilities Commission ("PUC") offers a rebate of \$200 per kilowatt (kW), up to \$1,000 or 30% of project costs, whichever is less, for residential solar power systems. However, due to the maximum incentive of \$1,000, this effectively sets a cap of approximately 5-kW for the rebate.

Installing a solar power system in New Hampshire can increase your home's value by twenty times your annual electricity savings. Fortunately, New Hampshire allows cities and towns to exempt that increase in home value from all associated property taxes.

? The average New Hampshire homeowner needs a 9.98 kW solar panel system to cover their electricity needs, which comes out to \$32,642 before incentives. Prices range from \$27,746 to \$37,538, but after the federal tax credit, that drops by 30%. While this may sound high, it will pay off in New Hampshire.

The average cost for a 5 kW solar panel system is around \$16,361 in New Hampshire. Once you factor in the 30% credit, the cost comes down to \$11,453.. When you file your federal income taxes, you can claim this incentive as a credit towards your federal tax bill.

Our team of dedicated New Hampshire solar energy experts is waiting to assist you with every aspect of your solar energy project. Starting with the initial site visit, through the permitting process, incentive paperwork, design, and complete installation, we'll guide you every step of the way and beyond.
