

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof-- in a region with long peak sunlight hours -- with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

How do I find a solar installer in my area?

Here are some other ways to find and connect with solar installers in your area: Talking to the people around you is a great way to learn about any local company. If your neighbors have solar panels, chances are they have a relationship with a local installation company and can give some insight into their experience.

How can I connect with a local solar installer?

Local home professionals are often connected with other local experts and have local solar installers to whom they regularly refer their customers. With a network of over 450 installers nationwide, soliciting quotes through the EnergySage Solar Marketplace all but guarantees that you can connect with a local solar installer.

What is a residential solar power system?

A residential solar power system consists of photovoltaic panels and other equipment that collect sunlight to produce energy for your home. How many solar panels do I need? The number of solar panels you'll need to meet the energy demands of your home depends on your home's location and roof size.

Should I buy or install a solar panel system?

Purchasing and installing your solar panel system is not the only option. And even if you don't own your home, you can still use solar energy. There are also leased and community systems shared with other people who may not own their homes (or have other reasons that sharing makes sense). Consider all the options to see which is best for you.

Should you choose a local or national solar installer?

If you choose an installer based near you, you can receive more dedicated attention because local companies don't have as many customers to worry about. Similarly, local installers rely heavily on satisfied customers to refer their friends and family, while national solar companies have a bigger budget for sales teams and marketing budgets.
