Why is solar development important in Cambodia?

Solar development will increase investment in modernising the existing energy infrastructure. Plus, off-grid solar and micro-grids will help electrify rural regions that often face the largest energy access issues. Finally, Cambodia's energy prices are some of the highest in the ASEAN.

Will Cambodia increase its solar energy investment in 2020?

The Cambodian government has said it will increase its investments in solar energy by 12% by year-end 2020 and by 20% over the next three years, up from less than 1% at present. "So, in 2020, we will have about 15 percent from solar energy, and we will continue to further increase that number," energy ministry
