

How many homes can a solar system power in Eastbourne?

The application, which has been submitted to Eastbourne Borough Council, is for land south of Cross Levels Way. It is estimated the solar panels would generate enough energy to power approximately 6,400 homes annually. The developer of the project, Low Carbon, says it will continue to engage with the local community on the plans.

Could a solar farm be built in Eastbourne?

A 31.9-hectare (78.8-acre) solar farm could be built in Eastbourne, if a planning application is approved. The application, which has been submitted to Eastbourne Borough Council, is for land south of Cross Levels Way. It is estimated the solar panels would generate enough energy to power approximately 6,400 homes annually.

Should solar panels be installed on Eastbourne roofs?

Eastbourne Green Party has argued that fitting solar panels to roofs would achieve the same benefits without the upheaval and potential effects on the landscape. The party's chair Susan Kerrison said: "Claims that it would deliver 'significant biodiversity and ecological enhancement' to Eastbourne Levels must be questioned."

How many solar panels are being installed at Eastbourne Hospital?

A hospital has installed 2,250 solar panels on its car park to cut carbon emissions. East Sussex Healthcare NHS Trust (ESHT) said it was part of a series of measures to reduce emissions by 57% by 2025 at Eastbourne District General Hospital. Other measures include new glazing, new roof insulation, and installing electric heat pumps.

What if Eastbourne Borough had rooftop solar?

Based on average metrics of rooftop sizes, if every household in Eastbourne Borough had rooftop solar installed, this would have a generating capacity of approximately 375MW. This would only meet 25 per cent of the borough's energy needs.
