

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is a floating solar PV system in Tuvalu?

From solar rooftops and the Off-grid solar-powered Capacitive Deionisation (CDI) systems to the pioneering floating solar PV with 100kW, innovative solutions like floating solar panels (a first for the PICs) and raised solar installations are being embraced in Tuvalu as the Pacific grapples with addressing the challenge of limited land space.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

What's happening with Tuvalu's mini-grids?

As Tuvalu journeys towards scaling up its mini-grids systems, the spotlight shifts to the electrical contractors poised to take on installation, operation, and maintenance tasks. With rooftop solar projects on the horizon, the training presented an invaluable opportunity for private sector players to gain insights into Tuvalu's mini-grids systems.

What can private sector players learn from Tuvalu's mini-grids training?

With rooftop solar projects on the horizon, the training presented an invaluable opportunity for private sector players to gain insights into Tuvalu's mini-grids systems. The training concluded with a site visit hosted by

# SOLAR PANELS GETTING CHEAPER TUVALU

TEC, offering participants a firsthand experience of advanced renewable energy technologies.

Target: Achieve 100% renewable electricity and increase energy efficiency by 30%, by 2020; Status: In progress; RES: Solar photovoltaics, and biogas from pig manure. Implementation: In 2009, the government of ???

In Funafuti, a small pond bordered by pig pens is now home to an innovative renewable energy pilot program, floating solar panels. Tuvalu Energy Corporation General Manager, Mafalu Lotolua says the project is a response to the ???

Infratec has installed 196 solar panels on the roof of the new Tuvalu Fisheries Department HQ on the main atoll of Funafuti, giving the building 73.5kW of its own renewable energy generation, plus 220kWh of battery storage.

# SOLAR PANELS GETTING CHEAPER TUVALU

Funafuti, Tuvalu: The installation of Tuvalu's inaugural 100.8kW Floating Solar Photovoltaic (FSPV) system has been successfully completed, with this cutting-edge system seeing 184 solar panels positioned on Tafua Pond in ???
