

Solar Panels. Solar technologies can capture a reliable, renewable source of energy that reduces demand on New York City's electrical grid and reliance on other fuel sources. Solar panels can generate electricity, capture and store thermal energy, and they may even take the place of more conventional building materials.

Solar power is a reliable, renewable source of electricity that reduces demand on New York City's electrical grid. Solar panels generate electricity, recover thermal energy for reuse and act as a roof covering. They can dramatically reduce a property owner's electric demand ??? ???

Data analysis by Zillow found that homes with solar panels in New York City sell for 5.4% more than comparable homes without them. The 5.4% premium for solar panels was higher in New York City than any other major metro, and higher than the national average of ???

NYC is targeting 1,000 megawatts of solar citywide by 2030, enough to power 250,000 homes. Solar panels allow buildings to generate their own emissions-free electricity and save residents money by reducing how much electricity they need to buy from their utility.

Find out which solar option is right for you: home installation (rooftop or ground-mounted) or community solar. Installing solar at your home is a simple and quick process. Solar panels can be mounted on either the roof of your home or to the ground, wherever conditions are ???

NY-Sun makes going solar easier and more affordable for New York residents. We offer incentives and financing options to lower the cost of purchasing and installing solar at home. NY-Sun works directly with solar contractors and developers to ???

NEW YORK??? Mayor Bill de Blasio today announced the launch of ElectrifyNYC, a program run by the Mayor's Office of Climate and Sustainability, in partnership with Kinetic Communities, and Neighborhood Housing Services of Queens and Staten Island, to help New Yorkers adopt solar panels and air source heat pump technologies in order to accelerate t

NY-Sun provides incentives and financing to make solar-generated electricity accessible and affordable for all New York homeowners, renters, and businesses. Using solar can help lower energy costs compared to using conventionally generated electricity.
