How to get a Solar permit Step 1 (optional) Solar  
App+ expedited review (roof-mount residential  
systems only) The expedited review of Roof-Mount  
residential solar panel (photovoltaic) systems may  
be completed voluntarily by visiting the SolarApp+  
website. There you will be prompted to register your  
account prior to submitting your proposed plans for  
review through their system.

Homeowners planning to go solar need to find an  
optimal surface to install their solar panels on.  
Rooftop installation is the most popular option  
thanks to its convenience and stability. But in a lot of  
cases, your roof may not be adequate to install a  
solar array to power your house.

The Solar Investment Tax Credit (ITC) is a federal tax credit for those who purchase solar energy systems for residential, commercial or utility scale properties. Through this legislation, all solar systems installed between 2022 and 2023 are eligible for a federal tax credit. If you qualify, you could reduce the cost of your system by up to 26

Solar Energy is one of the top and most innovative ways to reduce your carbon footprint. A typical residential solar panel system will eliminate three to four tons of carbon emissions each year; that's the equivalent of planting over 100 trees annually. Solar is also non polluting and is a natural recourse you can harness to do your part.

In a city like Oklahoma City where energy use is particularly high, installing solar panels is a great idea for those who want to do their part for the environment. When you go solar, your carbon emissions can be lowered by about 100 pounds each year.

Let's have a look at the average cost of solar panels in Oklahoma City. The average cost of a solar system in Oklahoma City is 3 per watt. The average Oklahoma City homeowner needs a 8.4-kilowatt system, which would cost about \$18,445 with the federal tax credit, or \$26,376 before the 0 tax credit is applied.
