

Is SunPower a good solar company?

SunPower is among the largest solar companies in the U.S. solar industry, with a history dating back more than 30 years in the past. Products manufactured by SunPower feature cutting-edge Maxeon solar technology to deliver high conversion efficiencies, generating up to 60% more power than conventional options.

What services does SunPower offer?

Sunpower has historically only installed panels from its manufacturing partner, Maxeon, but it is expected to expand its market starting in 2024. In addition to solar installations, SunPower services include the following: We used a detailed methodology to score SunPower's solar products and services in key categories.

Does SunPower still make solar panels?

Although it no longer manufactures its own products, SunPower designs three lines of residential solar panels: SunPower Maxeon (M-Series), SunPower Performance (P-Series), and the U-Series. Maxeon Solar Technologies, SunPower's former manufacturing arm, produces the Maxeon and Performance panels.

What are SunPower performance solar panels?

SunPower Performance solar panels demonstrate enhanced efficiency, quality, and reliability compared to Conventional Panels. The industry-leading reliability and production of SunPower solar panels combines with microinverter technology to maximise your roof's potential.

How much does SunPower cost?

At \$3.61 per watt, SunPower is not for budget shoppers. It's better suited for solar enthusiasts willing to spare no expense on the best of the best. But, keep in mind that Maxeon Solar Technologies no longer exclusively sells to SunPower, meaning you can install Maxeon's panels without the SunPower bill (but still at a premium).

What types of solar panels does SunPower offer?

SunPower offers multiple high-quality solar modules that are rigorously tested for system reliability, performance, and savings. There are many options of solar panels with varying aesthetics and wattages, but the main two types of solar technology are categorized as follows: Front-contact solar modules
